Profiles ◯ bfdurieux 🔗 Bruno Durieux 🔗 bfdurieux

Summary

Passionate Full Stack Software Engineer with 5 years of experience specializing in .NET and Angular development. Committed to writing clean and maintainable code .

Experience

Wex   **March 2023 - Present**
Software Engineer   Remote

• Developed and maintained features for the COBRA and Direct Billing multi-employer premium billing and payment solution using .Net Core, Angular and SQL.

• Conducted code reviews, implemented unit and manual tests, and authored test cases to ensure high-quality software.

• Built and managed CI/CD pipelines for efficient software delivery.

• Led the development team in the creation and deployment of a new application Portal.

• Providing mentorship and guidance to an intern within the Young Apprentice program .

CP-Pro   **March 2021 - February 2023**
Software Engineer   Blumenau, SC

• Designed, developed, and maintained features for Gerüstbau Office 4, LIFT, and CGM5 using .NET Framework,.Net Core, WPF, Angular, PHP, MySQL, and SQL.

• Contributed significantly to achieving 100% unit test coverage for Gerüstbau Office 4.

• Provided training and support to new interns.

Spintec (Pulsati)   **December 2020 - March 2021**
Software Developer   Blumenau

• Assumed full ownership and drove the successful execution of the CIDP project, a cosmetic test sign-up application built with SpringBoot (backend) and Angular (frontend). Accountable for managing project deliverables, providing accurate estimations, and leading project planning.

• Collaborated with UX on layout design.

• Managed the deployment process of the application to a Linux server.

Facil Espaider   **November 2019 - May 2020**
Intern   Blumenau, SC

• Contributed to the development and maintenance of the TRM project, an Issue Ticket tracking application, before transitioning to the Espaider product – a tool for lawyers to track ongoing legal processes – where I focused on developing and maintaining features for its web scraping module, utilizing .NET Framework, JavaScript, and Selenium.

• Managed the deployment of the Espaider application.

• Supported the onboarding process for new team members by contributing to existing documentation
